
PROTECT YOUR BUSINESS

IT'S HURRICANE AND SEVERE WEATHER SEASON

Do you know how to prepare your business for a storm?

- Save all files and shutdown all computers.
- Unplug Computers, phones, printers, and other networked equipment from walls.
- Get equipment off floors. Unplug computer and place on top of desk, away from windows if possible.
- Create contact list in the event you cannot get back to your office. List should include employees, clients, vendors, etc.
- Contact us to discuss business continuity plans. It's important that we have a plan in place should there be significant impact that prevents a location from re-opening once a storm passes.
- Make sure you have our contact info! Venture Pointe is available 24x7 for emergency support.
- Do NOT attempt to power down servers, phone systems, or surveillance systems. Contact us, we will make sure these devices are shut down properly if/when required.
